

# ANISO MOHAMED KILAS

## Software Developer

✉ Kilasaniso@gmail.com

☎ +254724638771

🌐 <https://github.com/kilas-Aniso>

## PERSONAL STATEMENT

As a child growing up in Mogadishu, Aniso experienced the terrible effects of conflict and violence on her community. These experiences ignited a constant flow of rhetorical questions in her mind, leading her to ponder how these problems could be solved. As a software developer, Aniso envisions technology as a powerful tool to create innovative solutions that can enhance access to vital services such as healthcare and education. Her passion lies in designing virtual learning environments and platforms to address the pressing issues of limited access to necessities like healthcare services in her community.

## EDUCATION

AkiraChix - codeHive  
Diploma in Software development  
Feb 2023 - Present

## RELATED COURSES

### Frontend Development

- HTML/CSS/JavaScript for web development
- Object-Oriented Programming
- Asynchronous functions and API integration
- React for web development
- Data Structures like merge sort and binary search

### Frontend Mobile Development

- Manipulation of layouts in codes
- Data Structure like Queues and Stack

### Backend Development

- Django for web application development
- Data types like tuples, list, set and dictionaries

### Product Management

- Prioritization features
- Product development process
- Agile methodologies

## SKILLS

- Ability to use HTML, CSS, JavaScript for responsive layouts
- Ability to use React for web development.
- Skilled in API Integration & Asynchronous Operations.
- Ability to use merge sort and binary search for data manipulation.
- Knowledgeable in OOP with Python, Kotlin, and JavaScript.
- Ability of manipulating data types such as tuples, list, set and dictionaries in python.
- Ability to use Django for web development.
- Ability to utilize git for version control.
- Ability to craft user stories that capture user needs and define clear acceptance criteria for successful delivery.
- Skilled in Agile methodologies (Scrum) and prioritization features.
- Understanding of user-experience and research methodologies.
- Ability to use Adobe Illustrator, Photoshop, Canva, and Figma for creating visually appealing UI designs.

## PROJECTS

### Low Immunisation Coverage Rate in Somalia

Researching low immunization rates in Somalia to develop a technical solution for better vaccine acceptance, accessibility, and effective tracking of children who miss vaccinations.

<https://docs.google.com/document/d/1eMQYavlgKXg1h3eDlvTHv53eJ8C1PzhYJ8AGshU1AQ/edit>

### Fresh Rahisi

Created an application that enables small scale green grocers to have a wider market reach and increase their sales

<https://github.com/kilas-Aniso/GreenKiosk.git>

### Dalmar Travel Guide

Created a travel guide website inspired by Somalia's beautiful beaches

<https://github.com/kilas-Aniso/Dalmar-Travel.git>

### Hiil Qaran

A Site To Document Somali Literature  
<https://github.com/kilas-Aniso/Hiil-Qaran.git>
